

North Texas FSDO FAA Safety Team (FAASTeam), SW19 presents:

Perfect Landings ! ! !

It's probably a fair bet that everyone who has flown an airplane has made a bad landing from time to time. Murphy's Law suggests that when we do so, it will always be embarrassing because a lot of people will be watching. So, let's look at some causes -- and some remedies -- to lessen that possibility. Bring your "war stories" and we'll all have a laugh at our occasional, but very human, lapses. Then, let's learn some techniques for making a more "perfect" landing every time...

Directions: From Dallas, take I-35E South to exit 403, East Service Rd S in Waxahachie to US 287 west. Exit right to Rex Odum Drive (stay left on Rex Odum) which will take you to Airport Drive. From Fort Worth, take I-20 to US-287 south toward Midlothian.
